Course Objectives: As a result of the participation in this activity, participants should be able to:

1. Define medical error and discuss the factors propelling medical error prevention and patient safety efforts.
2. Review Joint Commission and State agency standards, regulations relating to Sentinel/Adverse events, process of Failure Mode and Effect Analysis and Root Cause Analysis.
3. Discuss patient safety origins and Joint Commission Patient Safety Goals.
4. Provide information on the prevalence of diagnostic errors.
5. Review the diagnostic process and some of the factors that contribute to missed, wrong or delayed diagnosis and treatment.
6. Examine the Florida Board of Medicine's current 5 most misdiagnosed conditions and actual case scenarios.
